

Writing about THE TEST (This is a grade!)

I will not look at these until the 48 hour “waiting period” has ended so you can reveal information about the essays that we cannot discuss until 48 hours have passed.

Items to consider in your discussion.

- What book did you use for the 3rd question? Why did you choose that book? How well do you think you answered the prompt and discussed the elements requested?
- Discuss what you wrote on the 1st question. Did you address the prompt completely?
- Discuss what you wrote on the 2nd question. Again, did you address the prompt completely?
- What problems did you encounter on any of the questions?
- What activities, discussions, readings, etc. do you think helped you the most this year? Why do you think they helped?
- What new activities, discussions, readings, etc. do you think could be added for the students next year? Why do you think they would help the students?
- What test taking strategies appeared to help you the most, especially on the multiple choice selections?
- How prepared did you feel for the different sections of the test? Is there a section where you think additional preparation would have helped? What additional preparation do you suggest?
- Feel free to discuss anything else about the test and preparation for the test that you think is pertinent and important.
